Biotage® PS-DEAM, part numbers: 800515, 800430, 800431, 800432, 800433

Dear Valued Biotage Customer,

The purpose of this communication is to inform you Biotage will discontinue the resin products listed above, effective immediately.

Our commitment to compliance, supporting good working practices, local health and safety statues and sustainability means that we routinely review our use and consumption of certain chemicals or solvents in our processes at our manufacturing site in the UK. Due to REACH regulation, and specifically SVHC statues (substances of very high concern), we are unable to continue to operate some of those processes in the same way which means we now cannot guarantee supply of the same high-quality products as we would like. Since our aim is to provide high quality product, we have concluded that we will cease supply of these 8 products.

Biotage has sincerely appreciated and valued your support and apologizes for any inconvenience that the cancellation of these products may cause. We are firmly committed to supporting your continued success and look forward to being able to assist you in future.

Sincerely,

Sunil Rana, Ph.D., Global Senior Product Manager,
Scale Up Business, Purification and Scavengers
